EDUCATION

Amity University Noida

Bachelor of Technology in Computer Science and Engineering(CGPA -8.07)

July 2023 – July 2027

EXPERIENCE

FLUXMAP

May 2025 – oct 2025

Backend & DevOps Intern

Remote

- Designed and maintained automated CI/CD pipelines via GitHub Actions for zero-downtime deployments
- Engineered a containerized Flask backend using Docker and PostgreSQL; resolved production database issues and optimized queries to ensure data integrity.

Open Source Contributor

openfoodfacts-explorer

Remote

- Contributed to the open-source repository by managing dependencies via pnpm and tracking potential bugs in alignment with community standards .

PROJECTS

LogPulse – AI-Powered Observability Microservice | Java, Spring Boot, React, Google Gemini API GitHub

- Built an AI-powered observability microservice using Spring Boot and Google Gemini API that parses server crash logs and auto-generates execution-ready bash remediation scripts, reducing manual incident resolution effort.
- Developed a React frontend enabling users to upload or paste server logs and download auto-generated bash scripts, delivering a full-stack DevOps tooling solution with decoupled microservice architecture.

Medicos – Smart Healthcare Services | Java, Spring Boot, REST APIs, PostgreSQL GitHub

- Developed a scalable Java/Spring Boot healthcare backend and a React-based custom AI chatbot platform.
- Implemented role-based access control (RBAC) using Spring Security with JWT-ready architecture for secure, permission-scoped API access.
- Used PostgreSQL for structured data storage and optimized query performance.

Hostel Issue Management System | Java, Spring Boot, REST APIs, PostgreSQL, Docker, Render GitHub

- Designed and developed a web-based complaint management system to streamline hostel maintenance workflows.
- Built backend REST APIs using Java Spring Boot for issue submission, tracking, and status management.
- Containerized with Docker and deployed to Render; used PostgreSQL for structured data storage and optimized query performance.

TECHNICAL SKILLS

Languages: Golang, Node.js, JavaScript, TypeScript, Python, Java, C++, SQL, HTML, CSS

Frameworks: React, Express.js, Spring Boot, Flask, FastAPI

Developer Tools: AWS, Git, Docker, GitHub Actions, CI/CD

Libraries: Pandas, NumPy, Matplotlib

Databases: MongoDB ,PostgreSQL.

LEADERSHIP

MLH Student & RTC Member — Major League Hacking & Rewriting the Code (RTC)

- Organized and hosted interactive technical sessions on modern full-stack development ,DevOps methodologies and emerging technologies for student communities.

ACHIEVEMENTS

- Achieved **Top 10** ranking in **OOPS Odyssey - CodeCrux (Innovatex '25)**, a competitive object -oriented programming contest.
- Accenture Nordics – Forge
- Deloitte Consulting – Forge
